ABOUT TATTON

Tatton Investment Management Limited was launched in 2013 and is the market leading Managed Portfolio Service DFM in the UK, managing over £16.55 billion of assets (as at March 2024).

Our sole focus is investment management and we believe in the importance of high-quality financial advice. Therefore, we partner with Financial Advisers who are seeking an investment manager that can provide them with the investment services they need to meet their clients' needs.

Tatton is not a traditional wealth management firm that has adapted its business to work with Financial Advisers – we are a business designed to benefit the advice sector and place it at the heart of its product and service development.

Since our formation, we have helped drive down the cost of discretionary investment management in the UK, in particular through the fees charged by MPS providers. We take great pride that the average cost of MPS is now only around 50% more than our 0.15% fee, when 11 years ago it was more than double, and in many cases three times as much.

The team at Tatton are immensely proud to have won numerous awards such as Best Discretionary Fund Manager, the Best Investment Service Provider and the Best Outsourced Investment Management through the votes of Financial Advisers and Paraplanners not judging panels – the strongest endorsement of our founding principles of sustainable repeatable investment performance, lowering investment costs and improving service standards.
